Headline

Full-Stack Developer & Aspiring AI Developer | Python, TensorFlow, PHP, React, Java |
Building Web & Intelligent Solutions

About Section

I am a third-year Software Engineering student at Bethlehem University, passionate about software development and artificial intelligence. I have practical experience building websites for clients and developing university projects that apply programming concepts to solve real-world problems.

My expertise spans Full-Stack Development and includes hands-on work with:

-Backend: PHP, Java (OOP, Data Structures, Design Patterns), Python (including libraries such as TensorFlow for AI projects)

-Frontend: React, HTML, CSS, JavaScript

-Databases & Data Management: SQL, MySQL

I enjoy designing and implementing functional, efficient, and user-friendly applications that demonstrate solid coding practices and problem-solving skills. My projects reflect my ability to translate theoretical concepts from courses—such as object-oriented programming, data structures, and algorithms—into practical solutions.

I am eager to continue learning, contributing to meaningful projects, and leveraging my skills to build intelligent, scalable, and real-world applications

Experience

Freelance Web Developer — Self-Employed

Developed and delivered custom websites for individual clients.

- Built responsive, user-friendly interfaces using HTML, CSS, JavaScript, and React
- Developed backend systems using PHP and SQL

- Created full project flows from concept to deployment
- Focused on clean structure, maintainability, and performance

Skills

- **Languages:** Java, Python, PHP, SQL, JavaScript
- **Frameworks & Libraries:** React, TensorFlow
- **Web Technologies:** HTML, CSS
- **Core CS Skills:** OOP, Data Structures, Problem Solving

Now I don't have any.

LinkedIn Post:

Today I'm excited to share a small but meaningful milestone—my first post here on LinkedIn. As the saying goes, *“the journey of a thousand miles begins with a single step,”* and this is mine.

Over the past weeks, I've been working through Udacity's **AI Programming with Python and TensorFlow** program, and I'm now very close to completing it. The only part left is the final project focused on optimizing my LinkedIn profile—so here I am, taking that step.

This journey has helped me strengthen my skills in Python, NumPy, Pandas, and foundational AI concepts. More importantly, it reminded me how much I enjoy learning, building, and improving every day.

I'm looking forward to sharing more of my progress, connecting with people in the tech and AI community, and continuing to grow as a developer.

Here's to new beginnings—and to the many steps ahead.

Recruiter Message:

Hi Mr. Bashar Masri ,

I hope you're doing well. I recently came across the AI/ML opportunities at Asal Company and was really impressed by the team's work. I'm a Software Engineering student gaining experience in full-stack development and AI, and I'm very interested in opportunities that allow me to grow and contribute to meaningful projects.

I would appreciate the chance to connect and learn more about the position.
Thank you for your time!

Best regards,
Malik Alhurani
